A SCOTTISH WATER COMPANY

A case for treatment

Annual savings of £500k on transport.

Working closely with Devro to minimize ammonia pollution and develop a long term treatment system.

THE SOLUTION

We used our extensive stock of mobile kit to alleviate the problem at Devro's Glasgow plant. Then we worked intensively with Devro over several months to devise a long-term treatment system, combining chemical and air-scouring methods.

- We're working with Devro on ways to recycle ammonia and treated wastewater.

THE SUCCESSFUL OUTCOME

Devro now comfortably achieves environmental compliance.

- The company saves £500,000 a year on transport of ammonia-rich liquids.
